Castle Gardens

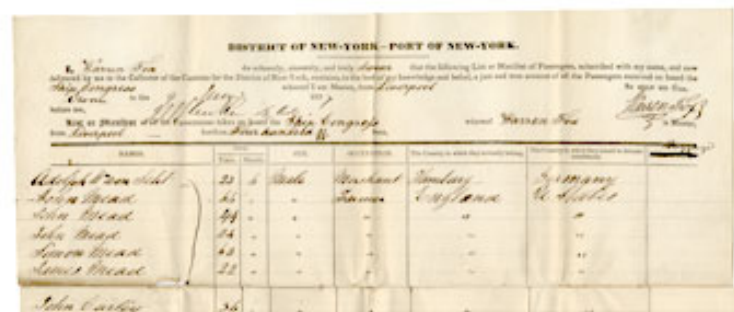

AMERICA'S FIRST IMMIGRATION CENTER

1/21/2012 - 63,000 new records added to CastleGarden.org!

CastleGarden.org is an educational project of The Battery Conservancy. This free site offers access to an extraordinary database of information on 11 million immigrants from 1820 through 1892, the year Ellis Island opened. Over 100 million Americans can trace their ancestors to this early immigration period.

Castle Garden, today known as Castle Clinton National Monument, is the major landmark within The Battery, the 25 acre waterfront park at the tip of Manhattan. From 1855 to 1890, the Castle was America's first official immigration center, a pioneering collaboration of New York State and New York City.

CastleGarden.org is an invaluable resource for educators, scholars, students, family historians, and the interested public. Currently the site hosts 11 million records, and support is needed to complete the complete digitization of the original ship manifests.

Free Forms

Getting organized and knowing how to address government agencies and organizations can help you get quicker, more effective results. Family Tree Magazine has created forms that can help you access and organize your family history information. They're available in two formats: text and portable document format (PDF). The text versions give you the basic form structure in files you can open in your word-processing [software](#). You can print, edit or even type your information right in the file. The PDF versions are read-only files with snazzier designs—they're suitable for displaying or sharing your research with others.

101 Best Websites for 2011

10/14/2011

By David A. Fryxell

Add a wow factor to your online research—our annual 101 Best Websites list highlights dynamic tools for discovering and sharing your family history.

We admit it—we're spoiled. Gone are the days when we were impressed by bare-bones lists of links. Even databases of transcribed records fail to thrill us as they used to. [Genealogy](#) websites have been around long enough now that we expect the same technological sophistication—and maybe a little razzle-dazzle—we experience every day elsewhere on the web.

Happily, plenty of [genealogy sites](#) (and others handy for family historians) have embraced what some are calling "Web 2.0." This year's 101 Best Websites roundup tilts a bit in their direction, giving a nod to flashy websites chock full of family history finds. Of course, we still value sites containing a zillion indexed records, but isn't it even better when such a database has an attractive interface and souped-up search capabilities?

Unlike last year, when we singled out free websites, the 2011 compilation includes both free and [subscription sites](#). Though some mostly free sites charge for premium services, you'll see a symbol only next to sites where you have to pony up for the core content. Ready? Go ahead and spoil yourself a little with these 101 stellar sites.

Putting Genealogy on the Map

6/7/2011

By David A. Fryxell

101 Best Websites for 2011: Tools for using maps in your research

Bureau of Land Management General Land Office Records

Find and map your ancestors' land records in this trove of images of more than 5 million federal land title records issued since 1820, plus survey plats and field notes dating to 1810.

Getty Thesaurus of Geographic Names Online

Those Getty billions pay off in this searchable database of more than 1.1 million locales, including historical places (with dates) and alternate spellings.

Google Earth

The downloadable Google Earth version 6.0 lets you [zoom](#) around the world on your computer or mobile device in 3D, and now includes historical imagery. Or check out the street views—the next best thing to visiting your ancestral places in person.

Historic Map Works \$

No longer for libraries only, this [subscription site](#) (pay per use or \$29.99 a month, \$249.99 a year) offers 1.5 million images, with more than 300,000 geocoded for its Historic Earth viewer. There's even an iPhone app with historic views of 25 states.

Newberry Library Atlas of Historical County Boundaries

Never again be stumped by the shifting county lines in your ancestors' state of origin. This free interactive atlas serves up maps where you can pan and zoom, add or subtract modern boundaries; you can also download the maps as "shapefiles" for use with geographic information system (GIS) software.

US Geological Survey

Find your ancestral stomping grounds, no matter how obscure, in the National Atlas or the Geographic Names Information System (GNIS), then plot them on the National Map and create your own customized maps.
